Inman Aligner

The Inman Aligner is fast, safe and great value. Your front teeth can be gently guided to an ideal position in just a few weeks - with most cases being completed in 6 to 16 weeks. The low-impact aligner is also removable, allowing you take it out to fit around your lifestyle.

Treatment is perfect for mild to moderate problems and focuses movement solely around the front smile teeth, leaving the back teeth alone.

During this time, we will monitor the treatment and ensure you are happy with the process. The length of treatment is case-specific but 6-12 months is realistic.
